

Combining Technological Precision with Social Responsibility in Training Data Preparation

Once upon a time....

- Underdog
- Idea
- Disappointment
- Comeback

Case Studies

- Industrial & Banking Automation
- Image Annotation
- Project KeBob
 - Posture Detection
 - Mobility Aid Detection

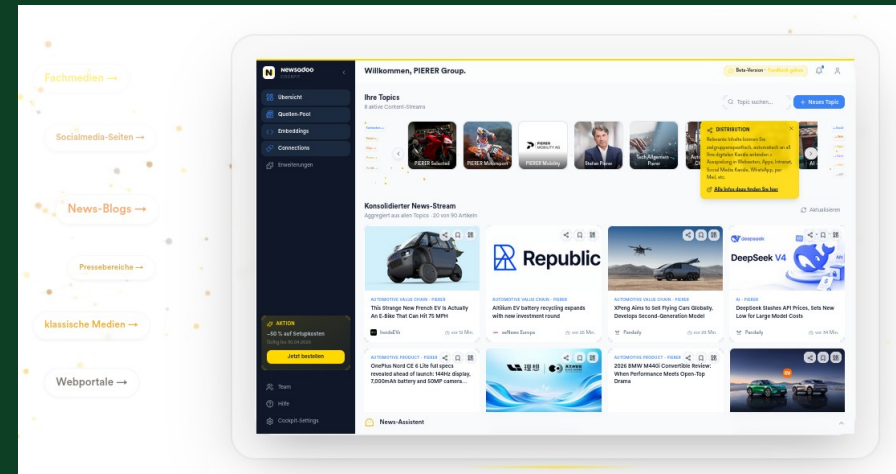

- Pre-Annotated Data (SAM3)
- 55.000 Images
- Images mostly from Public Datasets

- 44 % of automated annotations were incorrect
- Zero issues found in the last sprint
- RAS Annotations make the Difference
 - Object Detection AP75: +6%
 - Crop Classification Recall: +18%
 - Crop Classification Precision: +9%

- Media Monitoring and News Aggregation
- Text Annotation
- Gold Standard Set for Named Entity Recognition
 - Used for Evaluation of LLMs

Newsadoo

- German and English News Articles
- Diverse in Quality and Size
 - Financial Times – Instagram
 - 1 Sentence – Multiple Pages

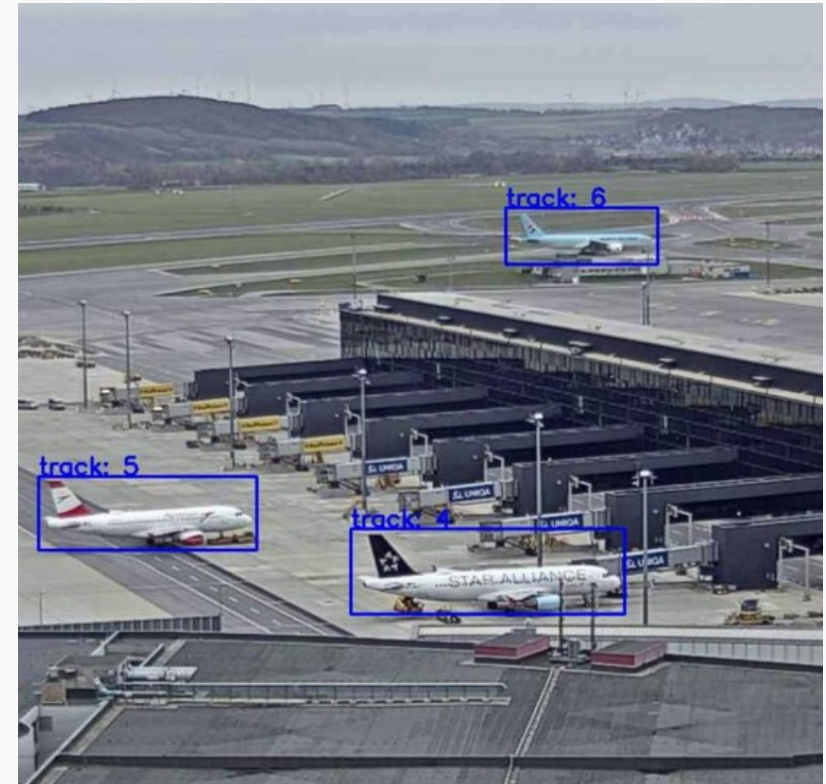

The screenshot displays the INCEPTION web interface for annotating text. On the left, a sidebar shows a list of annotations grouped by label, including 'LOC | Finsbury Park', 'LOC | Great Britain', 'LOC | Q12013', 'LOC | Vereinigtes Königreich', 'MISC | antisemitism', 'MISC | bipolar disorder', 'MISC | Jews', 'MISC | swastika', 'MISC | Wireless Festival', and 'MISCderiv | antisemitism'. The main area shows a news article snippet with various words and phrases highlighted by colored boxes and labels. For example, 'Kanye West' is labeled 'LOC | Kanye West', 'UK' is labeled 'LOC | UK', 'Wireless Festival' is labeled 'LOC | Wireless Festival', and 'Daily Mail' is labeled 'LOC | Daily Mail'. The interface also includes a top navigation bar with 'Projects' and 'Dashboard' tabs, and a bottom status bar indicating '1-9 / 9 sentences (doc 1 / 283)'.

- Delivered 1.000 fully Annotated News Articles
 - Including Named Entities
 - Including Multiple Layers of Related Links
- Zero issues found in the last sprint

- Air Traffic Control Systems
- Project SAFER
- Video Annotation

- Raw Data
- 16 Cameras / 360° View over Airport
- Total 384 Videos, each ~ 10 Minutes
 - Changing Weather Conditions
 - Changing Lighting Conditions
 - Massive Time-Pressure

- More than 5.2 Mio. Frames delivered within 3 Months
- 80 Pages Audit-Ready Handbook
- Last Sprint: Zero Issues found
- Performance of the model increased in all aspects
 - Up to +50% in overall detection accuracy
 - Up to +50% in overall tracking of objects

SUPPORTING SLIDES

Responsible Annotation Services

Expert Data Annotation and Validation for highest-quality AI systems.

Responsible Annotation Services GmbH is a specialized provider of high-quality solutions around data annotation, supporting AI training and validation with precision, scalability, and expertise. As a spin-off of the non-profit organization Responsible Annotation, we leverage a unique combination of technical excellence and social responsibility to deliver top-tier annotation services in our offices in Vienna, Linz and Hagenberg.

Our team consists of **highly skilled annotators, mostly neurodivergent individuals** with exceptional attention to detail, pattern recognition, and perseverance. Many of our annotators are on the autism spectrum, and we provide an environment where they can fully leverage their strengths. Led by our **seasoned Annotation Managers** who have long experience with IT project management, our teams are dedicated to delivering superior data quality and ensuring project success through a structured and collaborative approach. No project too small, no project too big – we cover your back!

Our Core Capabilities

- **Creation of customized labeling instructions**
 - We develop clear, traceable guidelines that are precisely tailored to your use cases.
- **Professional review of existing instructions**
 - Our team examines your current specifications and optimizes them for completeness, consistency, and practicality.
- **Validation of instructions against real data sets**
 - Through targeted testing we ensure that your directives seamlessly align with existing data packages.
- **Identification of optimization potential in data preparation**
 - We analyze your entire workflow and highlight concrete improvement measures to boost efficiency and quality.
- **Quality-assured data annotation**
 - Our experienced annotators deliver precise, error-free labels.
- **Bounding boxes, image segmentation, LIDAR data and many more**
 - We cover your back!
- **Comprehensive review of already annotated data**
 - We conduct thorough quality checks, correct inconsistencies, and ensure that your annotated data meets the highest standards.
- **Scalability & Rapid Deployment**
 - With a broad network of skilled annotators and domain experts, we can quickly scale teams to meet project demands.
- **Flexibility on infrastructure**
 - We can work with whatever our customers request: OnPrem or in the cloud, in your system or our hosted environment. We also cover all mainstream annotation tools on the market
- **Fully compatible with your data sovereignty needs:** All setups are compatible with strict data sovereignty, GDPR, and customer-controlled security requirements.
